Safety Message

TIPS FOR FREEZING TEMPATURES

Check Car Battery: The intense cold Utah is experiencing it can sufficient to kill weaker car batteries. So, if you know your battery is weak, getting it replaced or having the charger/jumper cables handy both at night and early mornings is advised!

Prevent Frozen Pipes: Be sure to have the heat turned up enough to avoid frozen pipes in the coming days. Wrap all exposed pipes located outside or in unheated areas of the home.

Remove garden hoses from outside faucets and cover vents around the foundation of your home. Know where your water main shut-off valve is located and how to use it.

In Sub-Freezing Weather

Drip outside faucets 24 hours a day (5 drops per minute). This is not necessary unless temperatures are expected to be 28 degrees or below for at least 4 hours. (Be sure to turn off the faucets after the threat of freezing weather.)

Open cabinet doors under sinks adjacent to outside walls to help warm the pipes.

In unheated garages, shut off water supply lines.

Safety Message

In sustained sub-freezing weather, let water drip slowly from inside faucets. Take extra precautions to protect pipes that have frozen in the past.

If You Are Not Going To Be At Home

Shut water off using the main water shut-off valve.

Drain all outside water faucets if your house will be unoccupied for several days (leave outside faucets open). Leave home heating system on at a low setting at least 55 degrees.

Open cabinet doors under sinks adjacent to outside walls.

If you have some pipes freeze, **NEVER USE A OPEN FLAME TO THAW FROZEN PIPES!!!** Thaw pipes gradually by using either a heating pad, space heater and/or a hair dryer. Turn furnace up to heat the basement or the main floor.

Dress in Layers: Dressing in multiple layers can keep you warmer than just putting on a heavy coat. This applies to everyone even if you only spend time walking from the home to the car, to the office and back to the car. It can become habit not to bring winter gear with you. Keep in mind that a break-down or flat tire in this weather would leave you very cold on the side of the road if you don't have proper winter weather clothing!

Remember your Pets! Bring them into the warmth, keep pets hydrated.
